20, 2021)**

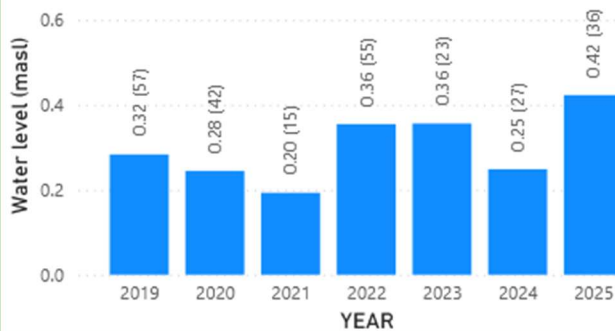

WATER LEVEL MONITORING SITE LOCATION

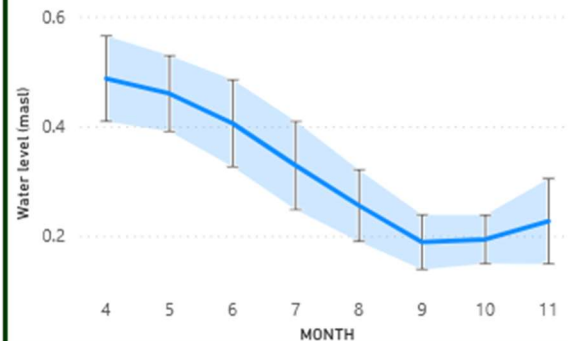

Inter-annual average water level fluctuation: 0.23 m

Average seasonal water level fluctuation:
0.35 m

AVERAGE ANNUAL WATER LEVELS (2019-2025)

MONTHLY AVERAGE WATER LEVELS
(2019-2025)

This summary is based on lake water level measurements collected from 2019 to 2025 during the April–November period, approximately weekly.

- The first chart shows the average water level (m) for each year. The numbers above each bar indicate the exact annual average water level, followed by the number of field visits in parentheses.
- The second chart shows average water levels for each month (2019–2025). The blue shaded area shows the typical range of water levels, and the black vertical bars show how much the levels can go up or down each month; the blue horizontal dashed line represents the overall average water level.

**The water level measurements are reported as depths relative to the gauge. These values are not absolute elevations but are intended to illustrate the fluctuations and patterns observed in Farlain Lake's water levels.

**Sampling dates may not coincide with the actual highest or lowest water levels during the reporting period.
