# 2026 WATER LEVEL UPDATE

# FARLAIN LAKE

## Survey Dates

- May 2, 2026
- May 11, 2026
- May 16, 2026
- June 08, 2026
- July 07, 2026
- August 17, 2026
- September 14, 2026
- October 19, 2026

# FARLAIN LAKE
# WATER LEVEL UPDATE

Date: May-02-26

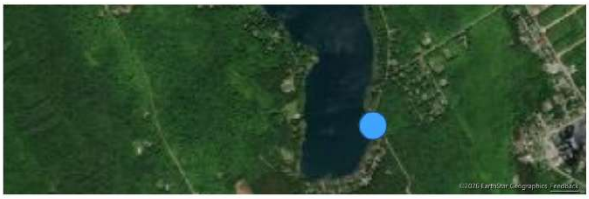
CURRENT WATER LEVEL (m)*

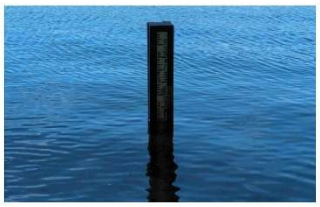
**0.76**

↓ Lower since last visit

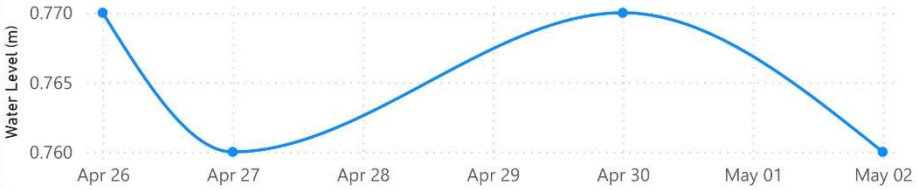
Above historic monthly average by 0.32 m

WATER LEVEL GAUGE LOCATION





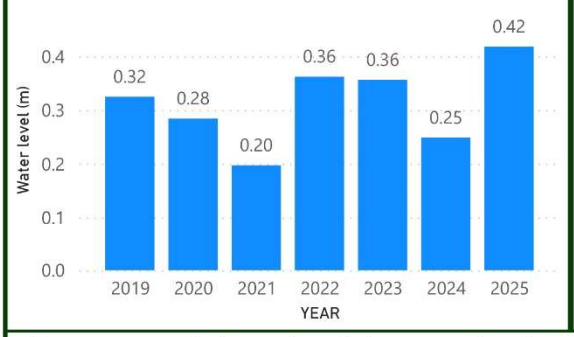
WATER LEVEL CHANGES IN 2026



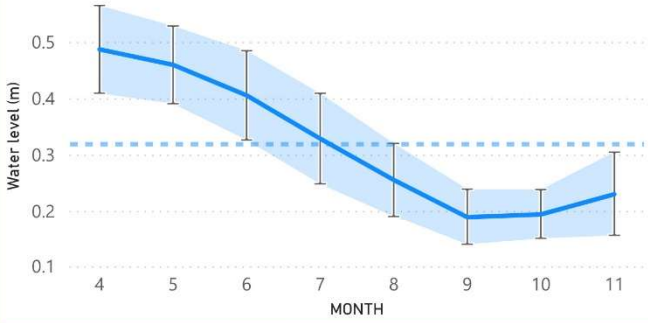
*The water level measurements are reported as depths relative to the gauge. These values are not absolute elevations but are intended to illustrate the fluctuations and patterns observed in Farlain Lake's water levels.

## HISTORICAL WATER LEVEL SUMMARY

AVERAGE ANNUAL WATER LEVELS (2019-2025)



MONTHLY AVERAGE WATER LEVELS (2019–2025)



This summary is based on lake water level measurements from 2019 to 2025.

- The first chart shows the average water level each year in meters. The numbers above each bar show the exact value.
- The second chart shows average water levels for each month (2019–2025). The blue shaded area shows the typical range of water levels, and the black vertical bars show how much the levels can go up or down each month; the blue horizontal dashed line represents the overall average water level.

This report is provided by the Severn Sound Environmental Association (SSEA) for general informational purposes only. The data and analysis presented are based on the best available information at the time of publication and are subject to change without notice. # FARLAIN LAKE WATER LEVEL UPDATE

Date: July-07-26

CURRENT WATER LEVEL (m)*

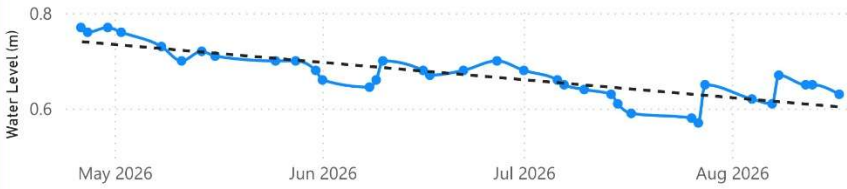
0.65

↓ Lower since last visit

Above historic monthly average by 0.34 m

WATER LEVEL GAUGE LOCATION

WATER LEVEL CHANGES IN 2026*



Seasonal Trend: Decreasing ⬇️ **

*Water level measurements are reported as depths relative to the gauge and are not absolute elevations. The blue line shows observed water levels, while the black dashed line represents the seasonal trend. The graph is intended to illustrate changes and patterns in Farlain Lake water levels over time.

**Seasonal trend status is based on the overall seasonal trend from the beginning of the year to the selected date. An increase of more than 2 cm is classified as increasing (↑), a decrease of more than 2 cm as decreasing (↓), and changes within ±2 cm as stable (→).
